Test Comments: *Planting conditions here were very moist. Persistent rains delayed field operations, and continued through June, when I saw water standing in nearby fields here. July and August were quite dry, so it is surprising that the corn was as good here as it was. Tom noted that they were disappointed with bean yields, but quite happy with what they have seen in their corn fields this fall.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
